An absolute classic

Trawalla Toorak comprises 10 attractive apartments, which feature refined elegance presented with a contemporary perspective. The interiors have been created by paying attention to fine detail and careful selection of appropriate materials.

A range of furnishing and décor choices permit occupants to enjoy spaces that reflect their individual taste and personality.

A variety of elegant marbles, limestone and hard impervious granites feature in the en-suites, kitchens and fireplaces.

Trawalla Toorak is located within easy walking distance of Toorak Village. The apartments vary in size, ranging from 206 to 405 m². Some apartments enjoy superb views of the city's skyline.

The exterior of the building evokes classical French traditions. The landscaping, paving and planting were created by renowned designer Paul Bangay.

Almost 1300 m² of natural stone feature in Trawalla's elegant interiors. All potentially porous surfaces were sealed and honed.
